

This Rules/Policy document is provided to you and your organization as a starting point or maturity checkpoint for existing rules/policies. It is brought to you on behalf of Jim McConnell, Principal Owner, and Ask McConnell, LLC – A Converged Security Services Provider. The content is not meant to cover every circumstance, industry, law, regulation, contractual requirement, threat, environment, or risk, but it provides an easy, defensible, highly accountable starting point for any organization. Please consult with your legal counsel and insurance provider about added requirements. If you know of peers that you think would find value in these resources, please have them contact us. These will be updated on our website regularly. We are not legally protecting these documents; we just ask for credit, shout-outs, and referrals if you find them helpful. If you have recommended updates, we are all ears. And if you need Converged Security Consulting and Training, please reach out, we would be honored to serve you and your organization.

Warehouse Security (Workers Edition)

Updated: 13 April 2025

Physical Security is about protecting human lives and organizational assets (e.g. employees, buildings, equipment, vehicles, etc.). These policies/rules are meant to be a baseline for personnel to comply with at all times while on organizational time or at organization locations.

- I will report physical security concerns, vulnerabilities, and threats to my supervisor or the organization's Ethics Hotline immediately upon discovery. If I suspect a crime is involved, I must call 911, if it safe, and then my supervisor

Access

- I will not share or let another individual use my Access Badges, unless responding to a life or death emergency
- I will badge into a badge-controlled location, no piggy-backing. Where there is an anti-passback exit badge reader, I will also badge out each time.
- I will check and lock all door and padlocks (internal and external), that I am responsible for before leaving premises. If I am the last person exiting a organization gate that has a pad lock, I must also lock that pad lock after I leave.
- I will verify that all visitors that I am overseeing, haved signed in and signed out through the paper or electronic sign-in process of each visit to any organizational facility.
- I will not share or let another person borrow any keys assigned to me, unless life or death emergency.
- I will not prop open any Perimeter or Key/Badged door, unless for immediate safety reasons and a organizational employee or guard, is monitoring the door
- If I lost or aware of any lost or stolen keys or access badges, I will report this issue immediately to the my supervisor.
- I will not allow human or vehicular tailgating
- I will verify all perimeter (people, rollup, and other entrances) doors are closed and locked before the end of each shift if I believe I am the last person to leave the facility.
- I will make sure all my visitors/suppliers/customers, that need to be escorted, will either be escorted at all times while on the organization's property or monitored by organizational personnel to make sure they remain only in areas they are authorized and only perform the duties they are authorized to perform.

Assets

- I will not use any warehouse assets for personal use unless I have written authorization by my supervisor, this includes building Wifi.
- I will verify fleet and other moveable/motorized vehicles or equipment, that I or my team uses or is responsible for, are locked (passenger doors and equipment/storage locks) before end of each shift, even if stored in locked building.
- I will verify all hazmat material, that my team uses or is responsible for, is stored properly and the storage containers are locked before the end of each shift.
- I will verify all portable equipment stored outside of locked buildings, that I or my team uses or manages, is tongue locked or wheel chuck locked before the end of each shift.
- I will not operate equipment or handle any hazard materials unless I have up-to-date training and certifications.
- I will not share UserIDs and Passwords with other personnel in the warehouse.
- I will not use authorized guest/staff wifi that impacts my productivity.
- I will verify all inbound items are being delivered to the right warehouse, at the expected time, and are delivered correctly (e.g. hazmat).
- I will verify all outbound items/assets that are supposed to depart the facility, are departing at right time, on that correct truck/vehicle, correct driver, and correct transportation company.
- I will not take (e.g. to home) any organizational assets from the warehouse without written authorization by my supervisor.

Signature Note: I am a huge fan of wet signatures on these types of documents for accountability and investigation reasons. So you can add the parts below to each rule/policy document or have a collective wet signature and references in the Security Agreement document, located on the same webpage you got this rule / policy from. Organizational preference.
